

## NFM Rebuilds Any OEM's Pressure Leaves

Cake bridging can cause a tremendous amount of damage to pressure leaves. Bending, tearing, and twisting occurs when solids built on the surface of one leaf press into the solids built on another leaf. Look at FixFilters.com for information on preventing this, but if you've got damaged leaves already, NFM is here to help. The cost of a rebuilt leaf is often half of what a new replacement goes for. We'll rebuild one for free to prove our craftsmanship and provide a price for the rest of your damaged leaves.

## NFM Recovers Pressure Leaves

Has the cloth on your Pressure Leaf Filter blinded? Let NFM recover your leaves, we'll custom fit the bag right onto your leaf. Our skilled filter bag manufacturers have recovered leaves from nearly every OEM on the market. We have no problem custom fitting your bag with closures and wear patches unique to your process.
